FEDERAL SYSTEMS DIVISION

August 1988

Dear Federal Systems User:

Today, getting the most out of your computer system is one of your organization's greatest challenges. "Managing Innovation" is the theme of Technetron'88, the annual conference sponsored by the International Society of Wang Users. This three-day session, held November 6 - 9, 1988 in Boston, MA, will examine issues which will impact your information systems decisions for years to come.

At Technetron'88, a special Federal Government Day will feature government and Wang speakers, exhibits demonstrating the latest secure product technology, and third party software vendor solutions. The following highlights some of the topics which will be discussed:

- o WIIS: Imaging Technology, presented by Alan Linden, Wang Laboratories, Inc.
- o Government Open Systems Interconnect Profile (GOSIP), presented by Jerry Mulvenna, National Bureau of Standards.
- o Wang OSI Solutions and the GOSIP Program, presented by Joseph Hielscher, Wang Laboratories, Inc.
- o The Computer Security Act of 1987, presented by Stuart Katzke, National Bureau of Standards.
- o Military Message Handling in a Wang Environment, presented by Major R.W. Knisely, Joint Chiefs of Staff.

Federal Government Day is an excellent opportunity for you to exchange ideas with your peers and hear what industry experts are saying about a wide range of issues - from industry standards, to the next technology frontier: integrated imaging. Please review the enclosed brochure for additional details on Technetron'88. To register, please fill out the enclosed form.

We hope you can join us at Technetron'88 for a most informative and enjoyable conference.

Sincerely,

Eugene Shugoll, Vice President
Federal Systems Division
